Professional Summary

Innovative **Software Engineer** with 3 years of experience building responsive web applications and system integrations. Possesses a framework-agnostic mindset, easily adapting to new technologies to build practical, cost-effective solutions. Deep expertise in the **Vue.js ecosystem** (Vue 3, Pinia) and modern styling frameworks. Proven track record of leveraging lightweight databases (like Google Sheets) and workflow automation tools (Viasocket) to rapidly prototype and deploy system functionalities. Distinctive ability to **integrate AI models** (LLMs) into web applications to automate workflows and enhance business operations.

Technical Skills

- **Languages & Core:** JavaScript (ES6+), HTML5, CSS3, JSON, RESTful APIs, basic Python
- **Frameworks & State Management:** Vue.js (Options & Composition API), Pinia, Vuex, Nuxt.js, Vue Router
- **UI Styling & Tools:** Tailwind CSS, Bootstrap, Sass/SCSS, Git, GitHub, Vite, Webpack
- **Advanced Integrations & AI:** LLM Integration (OpenAI API, Gemini), Viasocket, Real-time Data Handling

Professional Experience

Brooklyn Business School

Software Engineer

Cairo, Egypt

2022 – Present

Key developer responsible for building and maintaining the organization's digital ecosystem, focusing on practical integrations and operational efficiency.

- **Internal AI Support Agent (Operational Copilot):**
 - Engineered an internal AI agent to assist employees by analyzing historical customer interactions and previous scenarios.

- Utilized **Google Sheets** as a lightweight data source to feed enterprise knowledge into the LLM, providing employees with real-time, context-aware guidance on handling client inquiries.
- **Value CRM (valuecrm.net) - Ongoing:**
 - Developing a scalable CRM tailored for real estate and small businesses using **Vue 3**, **Pinia**, and **Tailwind CSS**.
 - Integrating Facebook Leads API for streamlined lead management and planning the integration of AI models for predictive data analysis.
- **Resourceful System Integrations & Automation:**
 - Utilized **Google Sheets** as a lightweight database to rapidly develop and deploy automated workflows for student payment reminders and email notifications via custom scripts.
 - Implemented advanced workflow automations using platforms like **Viasocket** to connect internal systems without complex infrastructure overhead.
- **Internal CRM System (Brooklyn CRM):**
 - Built a custom CRM from scratch to manage student data, enrollments, and sales workflows.
- **Task Management Platform (1task.net):**
 - Engineered the frontend of a complex SaaS platform for asset lifecycle management using **Vue.js** and **Tailwind CSS**, utilizing Vuex for real-time dashboard updates.
- **Educational Portal (brooklynacademy.net):**
 - Revamped the main website UI/UX, optimizing course listing pages for better conversion rates.
 - Enhanced site performance and SEO scores through efficient code splitting and lazy loading assets.

Education

ITShare Training Center

Frontend Development Diploma

Comprehensive training covering HTML, CSS, JavaScript, and Vue.js Framework.
